Abkhaz Personal Names

Viacheslav A. Chirikba
Abkhazian State University, Sukhum

Abstract
The paper presents a study of the Abkhaz personal names. Traditionally, Abkhazians, a Caucasian people living in the Republic of Abkhazia (many Abkhazians live also in Turkey and in some Middle Eastern countries), used a two-name system, consisting, as a rule, of the surname plus the postposed first name. The Abkhaz personal names are analysed with regard to their origin, structure, semantics, and social status. The onomastic system in general, as well as the tradition of naming among the Abkhazians are outlined as well.

Keywords
Abkhaz, Abkhazian, Personal Names, Surnames, Naming, Republic of Abkhazia

1. ABKHAZ PERSONAL NAMES: GENERAL FEATURES
Abkhazians are an autochthonous Caucasian people living in the Republic of Abkhazia, situated on the Caucasian Black Sea coast between Russia and Georgia. The closest linguistic kin of Abkhaz are Abaza (both can be regarded as dialects of one language), Kabardians, Adygheys (the latter called together Circassians and speak close dialects), and Ubykhs. These languages form the small West Caucasian family related to the East Caucasian (or Nakh-Daghestanian) linguistic family; the West and East Caucasian branches form the North Caucasian family, which is not related genetically to the other indigenous Caucasian family, Kartvelian. The number of Abkhazians in the Caucasus is estimated at around 122,000. Many more Abkhazians live in the Diaspora (mostly in Turkey, but also in some Middle Eastern countries, like Syria and Jordan), where their ancestors had to flee the Russian-Caucasian war in the middle of the 19th century. The Caucasian Abkhazians are Orthodox Christian (some 70 percent) or Sunni Muslims (some 30 percent); in the Diaspora, they are all Sunni Muslims.
The repertory of Abkhaz personal names is extremely rich. The largest collections of Abkhaz first names were published in Inal-ipa (1963) and especially in Inal-ipa (2002). Other lists are to be found in the publications by Dirr (1915), Gulia (1925: 305-310), Bgažba (1964), Anšba (1995: 393-401), Amičba (2000; 2007), Šlaq’ral et al. (2008) and some others. The first names were analysed by Marr (1914), Bgažba (1964; 1988), Kečba (1996), Culaya (1971), Inal-ipa (2002), Piliya (2003), and Chirikba (Čirikba 2007). The historical Abkhaz names as recorded in Roman, Byzantine and Georgian chronicles are analysed in Amičba (1999, 2000, 2003, 2010); the Abkhaz surnames are discussed in Inal-ipa (2002), Dasaniya (2003), Kuprava (2003), and Maan (2003). The latest monograph on Abkhaz names and surnames, containing both extensive names’ lists and their analysis is provided by Amč’-pha (2007).

Traditionally, a two-name system was used, consisting, as a rule, of the surname (á-žwJ) plus the postposed first name (á-xH), e.g. Giaci Rał, a-Sažba Smel, Xoš Darafej, Dbar Foka. Certain surnames can also have patronyms (see below). Besides, a person often has an unofficial pet name, given to him by the family when a child. Some people, beside their official first names, have several other given names. Typically, different names of a person are used by different circles of peoples surrounding him or her: family, friends, colleagues, etc. Thus, as cited by Inal-ipa (2002: 23), a villager of the village of Gup by surname Šlaparia had the following names: šiakdra, Lamšac, šažio, Mark’az. My own mother was given by birth in the official registry the name Raja, but the younger circle of the family (e.g., cousins) and neighbours called her Inačka (from Inna, with a Russian diminutive suffix -ka), while the elder part of the family (parents, uncles and aunts) addressed her by a pet name Čišek; in the school and outside the family she was known as Ira (a name, which she gave to herself, disliking the name Inna) or, in official address, Irina, whereas in her passport, on her adulthood, she was registered as Raisa (the full name of the name Raja). Such multiple name-possessing was quite typical until recently among the rural Abkhazians.

A new three-name system was introduced by the Russians in the middle of the 19th century, structured on the Russian model: “first name + patronymic (= father’s name) + surname”, e.g. Giargi Aleksej-jepa Žizarija “Georgij Aleksej-his son Dzidzarija”. The Russian patronymic suffixes -ovič
(masc., e.g. Ivan-ović, 'son of Ivan') and -ovna (fem., e.g. Ivan-ovna 'daughter of Ivan') have as their equivalents in Abkhaz -jo-pa 'his son' (e.g. Xw9xwdt-jopha 'Xuxut's son') or -jo-pha 'his daughter' (e.g. Xw9xwdt-jophya, 'Xuxut's daughter'). This system is used now, in accordance with the Russian practice, in official situations: all three names are used when referring to a person, and two names, i.e. first name plus patronymic, when addressing a person.

The inheritance of surnames is patrilineal, from fathers to children. The giving of a name to a child was regarded as an honour and was often committed by the child's grandfather or his/her maternal uncle.

There are in general more masculine names than feminine ones. Some first names can be used both as masculine and feminine, e.g. Almasxan, Arda, Cakwa, Gwagwat Gwagwa, K'amač'jdč'J, K'ak'ka, Mina, Saqwa, Šlaškwa, Ximwër, Xek'we, Šek'we, etc. Certain first names can be used as masculine in one dialect, and as feminine in the other; e.g. K'ač'jdč'J, Klatwan are used as masculine in the Bzyp dialect and as feminine in the Abzhywa dialect (Bgažba 1988: 198).

The increasing interest in original roots and native traditions as observed in recent decades stimulate parents to give their children traditional names (e.g. Astan, Astanda (fem.), Batal, Gwenda (fem.), Kaja (fem.), K'an, Sasrdqwa) or newly coined names some of which became popular, e.g. Axra 'rock', Amra (fem.) 'sun', Amza (fem.) 'moon', Mra-laša (fem.) 'sun-light', Mra-mza (fem.) 'sun-moon', Ric'a (fem.) 'name of the famous mountain lake', etc., unlike the Soviet period, when Russian names were more popular. Some of the new names stem from the popular Nart epics, such as Nart, Xwazwarp, Satanej-Gwa&a (fem.), though other epic names were also used, such as the names of the main hero Sasrdqwa and of his sister Gwenda.

Traditionally, even young people could address the elder people by their first names. However, nowadays, under the Russian influence, especially in official situations, they started to use, while addressing an adult person, his/her first name and patronymic name. In vocative forms, mostly when addressing a child, a hypocoristic suffix -a can be used with names ending in a consonant to express endearment, e.g. Zurab-a '(dear) Zurab!'.
2. HISTORICALLY ATTESTED NAMES

The early Abkhaz first names as recorded in Roman and Greek (Byzantine) sources belonged to the local highest aristocracy and were of Iranian (Savlak, Resmag, Spadag) or Roman origin (Julian). The Georgian mediaeval and later chronicles provide us with important evidence on personal names used in Abkhazia. Again, belonging to the highest nobility, they are mostly of foreign origin: Iranian (Anos, from Pahlavi anōš ‘immortal’, Gozar/Yaozar, cf. Persian āzar ‘fire’, Bagrat < *bagadāta- ‘given by God’, Guranduxt ‘daughter of Guran’), Greek (Theodore ‘given by god’, Dimitri ‘earth-mother’, Theodosi ‘dedicated to God’, Leon ‘Lion’, Georgi ‘farmer’), Roman (Istvine/Justinian ‘righteous’, Konstantin ‘constant’) (cf. Amičba 2003: 55, 58). These names reflect the influence of Roman, Byzantine and Iranian civilisations. On the other hand, some of the names as attested by ancient foreign sources are undoubtedly of local origin, cf. the recorded by Byzantine chronicles such names as Tuana (cf. Abx family name tavan), Khados (presumably reflecting Old Abx qada ‘leader’), and recorded by mediaeval Georgian sources such name as Lasa (from Abx laša ‘light’).

3. PRESENTLY USED NAMES

All given names can be divided into two groups according to their origin: native and borrowed. An additional third group includes names, which combine native and borrowed elements. Native first names can be structurally simple, compound or derived, used with or without the definite-generic article. Among simple names, there are also historically complex or derived ones, but now unanalysable. Names can be based on the designations of animals, birds, plants (see the examples below), names of the cities (e.g. Adesa ‘Odessa’, Adler), on epithets (Azac ‘the only’, Mša-g ‘fearless heart’, Macws ‘lightning’), etc.

3.3. Compound Names

The following names can be grouped together according to the choice of the typical element of the compound.

3.3.1. With the Postposed -gw(ə) 'heart': Abza-gw < *Abaza-gw 'Abaza-heart', A'dgla-gw < *A'dgla-gw 'Adyghe/Circassian-heart', La-gw 'eye's heart', Mśa-gw 'fearless heart', Əla-gw 'hare-heart'.

3.3.2. With the Preposed gw(ə)- 'heart': Gwə-zba 'heart-decide', Gwə-cckak 'heart-swift', Gwə-a băng-heart-old'.

3.3.3. With the Preposed la- 'eye': A. la-pša 'ART-eye-beautiful', La-cəš 'eye-grey', La-c'ə 'eye-bird', La-gwəryla 'eye-joy'.

3.3.4. With the Postposed -nəqwa 'walk/walker': Aaə-nəqwa 'lazy-walker', Mjiə-nəqwa 'road-walker', Shahx-nəqwa 'strong-knee-walker', Əxə-nəqwa 'mountain-walker'.

3.3.5. With the Preposed xə-'gold': Xə-rpə 'golden-lad', Xə-mra (fem.) 'golden-sun', Xə-rqəəbə 'gold-smartened', Xə-cəs (fem.) 'golden-bird', Xə-blə (fem.) 'golden-eye', Xə-c (fem.) 'golden-tooth', Xə-ma (fem.) 'golden-hand', Xə-mca (fem./masc.) 'golden-fire', Xə-zə (fem.) 'gold-old'.

3.3.6. Some other Compounds: Mra-mza (fem.) 'sun-moon', Ə-kə't (fem.) 'water-hen', Ə-gola 'oak-standing', Ə-abay 'hare-male', Xac'a-kə'c 'man-short', etc.

3.4. Derived Names

The following names can be grouped together according to the choice of the typical derivational formants some of which bear diminutive meaning.

3.4.1. With the Postposed -c (a-c 'tooth' > 'single'): A'dgla-c (< *A'dgla 'Adyghe'), A'dgwa-c (cf. A'dgwə), Əla-c (aţa 'hare'), Kəəbrə-c (a-kəəbrə 'mosquito').
3.4.2. With the Postposed -gʷəgʷ: D-gʷəgʷ, La-gʷəgʷ, Maẓi-gʷəgʷ, Taẓi-
gʷəgʷ, Haẓi-gʷəgʷ, ẓi-gʷəgʷ, Tad-gʷəgʷ (fem.), T-gʷəgʷ (fem.), Xər-gʷəgʷ (fem.), Cam-gʷəgʷ (fem.), ẓəm-gʷəgʷ (fem.).

3.4.3. With the Postposed -gʷər: Ad-gʷər//D-gʷər, Beslan-gʷər, Be/aẓi-gʷər. Can be a voiced (by assimilation) variant of the following.

3.4.4. With the Postposed -kʷər(a): Dada-kʷər (dada ‘father’), Ẓa-kʷər (aẓa ‘hare’), Ẓaẓ-kʷər (a-ẓaṣ ‘awl’), Xac’a-kʷər (a-xac’a ‘man’), Xər-kʷər (a-xər ‘gold’), Xəc-kʷər (xəc ‘golden tooth’), Nac’-kʷər (fem./masc.).

3.4.5. With the Postposed -la: Baba-la (cf. baba ‘father’), Badyा-la, Baza-la (cf. Abaza, ethnic term), Bat’-la (cf. Bat’a), Bəz’-la (cf. Ad bəz’e ‘fox’?), Bəz’-la (cf. Bəz’-la, Gʷada-la (cf. Gʷada).

3.4.6. With the Postposed Diminutive -na: Apša-na (fem.) (apša ‘holy’), Bač’-na (Bač’-masc. name), Cgʷə-na (fem./masc.) (a-cgʷə ‘cat’), Čərkgʷə-na (a-čərkgʷə ‘lame’), Čəs-na (fem.) (a-čəs ‘bird’), Gʷada-na (Gʷada masc. name), Kʷtə-na (a-kʷtə ‘hen’), Kʷčələ-na (fem.) (Kʷčələ fem. name, cf. a-kʷčələ ẓ ‘chicken’), Takʷ(ə)-na (fem.) (Takʷ fem. name, cf. a-takʷ-əzʷ ‘old woman’), Xər-na (fem.) (a-xər ‘gold’), Xʷčəl̬ə-na (fem./masc.) (a-xʷčəl̬ə ‘child’).

3.5. Complex Names: Gʷə-m-šwa ‘fearless’ (gʷə ‘heart’, -m- negative infix, ẓwa ‘to fear’), La-gʷə-z-to-w ‘eye-heart-where is’.

3.6. Borrowed Names
The borrowed first names belong to the following major groups according to their origin: 1. Oriental (Turkish, Arabic, Jewish and Persian); 2. Kartvelian (Megrelian, Georgian); 3. Circassian (Adyghey, Kabardian); 4. Russian; 5. Greek; 6. (Old) Ossetic/Alanian; 7. Other.

The majority of "Oriental" first names, which can also be generally labelled “Muslim” or “Islamic” names, irrespective of their Turkic, Arabic, Persian or Jewish origin, came to Abkhazia starting from the 16th century, from Ottoman Turkey and often reflect the Ottoman Turkish pronunciation. Smaller parts of these names came via neighbouring Kartvelians (Georgians or Megrelians) or Circassians. Some of the etymologically Turkic names are not Anatolian (Oghuz) by origin, but northern (Kipchak) Turkic (i.e. Crimean Tatar, Noghay or Karachay-Balkar), coming from the
North Caucasus. The Greek names came directly, or via Georgian/Megrelian and Russian.

3.6.1. Turkish//Turkic: Adamör < Ay-demir (ay 'moon', demir 'iron', 'iron moon'), Alap < Alp 'brave', Aslan < Arslan 'lion' (> 'hero'), Güzel//Gwzel (fem.) < güzel 'beautiful'; Hanım (fem.) < hanım 'lady, woman, mistress (of a household)', K=şovak* < küçük 'small, little; young; child', Ozbak < Ozbek 'Uzbek', Qan < qan 'blood' (via Circ intermediary, see 3.6.10), Qara < qara 'black, dark', Te(j)mør < temir 'iron', Tengœs < tengiz 'sea', etc.

3.6.2. Arabic: Abdala < 'Abdallah 'servant of God', Aajša (fem.) < 'Ayšā 'vivacious'; Aminā(t) (fem.) < Aminā 'being safe, confident' (the Prophet's mother's name), Azamat < Azamat 'greatness', Ā(z)īz < Āzīz 'dear, precious', Farida (fem.) < Farīda 'unique, precious', Ki(e)rām < Karīm 'noble, generous', Kâdör < Qādir 'powerful', Mamsīr < Mansūr 'victorious', Mažet < Māğid 'glorious', Murat < Murad 'desired', Sej jó/./Sajód < Sayyed 'master', Šlamal < Ğamāl 'beauty', Šuma < Jum'a 'Friday', etc.

3.6.3. Jewish: Aajsa (via Arab Aysa) < yehösū'ā 'Jesus' ('god will save'), Ajub (via Arab ayyūh) < Ḥūbh 'persecuted', Ėbāram < 'Ab-ḇāḥām 'father of many (peoples)', Dawôt < Dāwid 'beloved', Jasôt/Jisôt/Jisopot < Yosēf 'he (god) will multiply', Musa/Mòsā (via Arab Musa) < Mošeh 'Moses', Salumman//Salmon/Šwejman/ŠHiman (via Arab Sulaymān) < Šelomoh 'peaceful', etc.

3.6.4. Persian: Arda < Arda (< Arta) 'truth; righteous', Ardašır/n < Ardašir 'holder of good power', Bagrat (via Geo) (see above), Fardawas < Firdous (via Arab) 'paradise', Nawrız < Navruz 'New Year', Raštóm/n < Rustam 'strong and well built', Gwññara (fem.) < Gulnar 'pomegranate flower', Temras (via Geo) < Tahmurás 'strong body', Xwšet < Xuršid, Xwaršed 'sun', Zurab/Žwrab (via Geo) < Sohrab, etc.

3.6.5. Kartvelian Names: Anzor < Geo azna-ur-i 'born free' (of Persian origin with the Geo suffix -ur-i), Bûyör < Megr baytri 'sparrow', Č'ınč'a < Megr č'ınča 'wren' (a kind of bird), Dač'ī < a-dač'ī 'chain' < Megr/Geo ʃač'v-i 'chain (mail)', Gâr(i)/Geri < Megr geri 'wolf', Gwšel (fem.) < Geo gugui 'cuckoo', K'âc < Geo k'âc-i 'man', Lamk'ac < Geo Lomik'ac-i 'lion-man', Mšaja (fem.) < Geo Mšia < mže 'sun', Natela (fem.) < Geo Natela 'light (of colour)', Šaba (fem.) < Megr Šaba, diminutive from syabi 'girl', etc.

3.6.8. Russian Names started being used since the introduction in Abkhazia of Russian rule in the middle of the 19th century and became especially popular during the Soviet period. Curiously, the Abkhazians regarded the short or diminutive forms of Russian names as independent names, so that in a family one son could be given the name Volodja, and the other – Vova (both are short forms of Russ Vladimir); cf. in the same vein such pairs as Ruslan (full form) and Rusik’, Vanja and Vančk’a (from Ivan), etc. Cf. also such feminine names as Ančk’a (Russ dimin. Aněčka < Anna), Mančk’a (Russ dimin. Manečka < Marija), Verčk’a (from Russ dimin. Veročka < Vera), masculine: Andrušk’a (Russ dimin. Andruška < Andrej), Aljoša (Russ dimin. Aloša < Aleksej), Wank’a (Russ dimin. Vančka < Ivan), etc. Besides, the Abkhazians used the Russian diminutive suffix -k(a) to add to non-Russian names, cf. Žium-k’a (from Žuma < Arab ‘Friday’), Bərfən-k’a (fem., from Bərfən < Tu ‘silk’), Čišči-k’a (fem. and masc., from native Čišči(a)), etc.

All earlier borrowed Russian names reflect their oral adaptation as perceived by Abkhazians. The contemporary Russian names usage is in more conformity with their Russian source, with short forms being used in unofficial discourse and “official” forms used in official discourse and in documentation. In general, modern Russian names used by contemporary
Abkhazians do not deviate much from their usage by the Russians themselves.

3.6.9. **Names of (Old) Ossetic/Alanian Origin**: Altar < Osset ældar ‘arm-holder’, Astan(a) < Osset Astan ‘we are eight’ (i.e. children in the family), Avdhenia, probably < Osset Avdan ‘we are seven’, Soslan/<Sosran < Osset Soslan ‘name of a Nart epics hero’, Zalina (fem.), cf. Osset (Digor) zarjnea (gold(en)), etc.

3.6.10. **Borrowed Formants** can be attached mostly to foreign and more rarely to native names. Below is the most typical repertory of borrowed formants forming Abkhaz personal names.

(a) -gleri/-gleri/-gleri/-gleri, from Crimean Tatar title girej (of Mongol or Greek origin), which was postposed to the names belonging to the dynasty of the Crimean rulers; cf. such names as Al-gleri/Al-gleri, Aq-wlan-gleri, Aškan-gleri, Aš-gleri/Aš-gleri, Bat’er-gleri, Kwč’gleri, etc. This formant entered Abkhaz most probably through Circassian intermediary.

(b) -bej/-bej, from Tu bej ‘master, chieftain, ruler, prince’, e.g. Almas-bej, Arzaa-bej, Ahmdt-bej, Bak’er-bej, Dawet-bej, Edør-bej, Mstaa-bej, Q’an-q’or(bej).

(c) -bakl, from Turkic bek ‘master, leader’: Al-bakl, Marza-bakl, Q’wél-bakl, Salam-bakl, Talum-bakl, Šlam-bakl.

(d) -q’an, from Kab q’an ‘foster child, boy from aristocratic family raised by a lower status family’, from Turkic q’an ‘blood’: Arza-q’an, Atlas-q’an, Bayør-q’an, Damar-q’an, Pšl-q’an, Tatar-q’an, Zawđ-q’an.

(e) -q’or, from Kab q’or ‘son’: Adlag’q’a-q’or, Badrò-q’or, Bazar-q’or, Dahr-w’or, Mdz’w’or, Mòsra-q’or, Sasra-q’or, Q’anš’or, Tarsa-q’or.

(f) -xw(a) (Abż)/-xw(a) (Bz), from Ad q’or ‘son’; Aq’lat’-xw, Dašlan’-xw(a), Fat-xw, Q’an-xw, K’lat’-xw, Şat-xw, Şalat-xw, Šarat-xw.

(g) -šaw/-šow (Bz)/-šaw/-šow (Abż), from Circ šawe ‘youth; son’: Jaš-sow, K’la-sow, Mard(a)-sow, Nar(t)-sow, Q’an-sow, T’aq’-sow, Tator-sow.

(h) -xan, from Tu han ‘ruler, khan’. With masculine names: Almas-xan, Arw-xan, Astør-xan, Bajir-xan, K’ez’ima-xan, Zelim-xan, Šlarem-xan.
With feminine names: Alddš-xan, Čørba-xan, Čabar-xan, Gwašša-xan, Klaaba-xan, Q'ajmdt-xan, Šlam(x)-s-xan, Xarib-xan, Ŷlaaba-xan.

(i) -hanöm (in feminine names), from Tu hanım 'lady': Edld-handm, Ejza-hanöm, Enša-hanöm, Esma-handm, Maria-hanöm, Rabia-hanöm, Safra-hanöm.

3.7. Childish or Pet Names

Children are often given names, based either on traditional pet names, or on occasional or onomatopoeic words, which are used by the close family circle and friends, in some cases throughout the whole life of a person. The examples of typical masculine child-names: Akač'Ja, Čfeya, C'Bc'a, K'agJ, K'dka, Maga, P'dťa; T'uk'i; the feminine child-names: Öana, Č'dka, Q'amaž, K'sna, Tej, T'ut'k'a, T'ęš'k'a, Xwsisa. Diminutive forms of names can be formed by adding of the adjective a-xya- 'small, little', e.g. Žwrab-xya- 'little Zurab'.

3.8. Taboos

Traditionally, the daughter-in-law was strictly forbidden to call her husband and his closest older relatives by their first names; instead, she had to choose special words in order to address them. Therefore, when the children are given first names, they should not coincide with the names of the older members of the family, or of the ancestors, in order to avoid using them by the children's mother. The husband too was forbidden to call his wife by her first name in public, neither was he allowed to call the elder relatives of his wife by their first names.

The marriage partners, while addressing each other, use as substitutes for their names such words as at', at'a ('soft'), alapša ('beautiful eye(s)'), xaara ('sweetness'), lašara ('light') (Amičba V. 2000: 20), sdxazdna ('my treasure'), etc., but the use of these is limited to personal communication and they are not supposed to be heard by elders. In public, the personal pronouns are used as vocatives: bara!//o, bara! 'you (fem.)!'//'oh you (fem.)', wara!//(o wara >) wara! 'you (masc.)!'//'oh you (masc.)!'.

The father-in-law was often called by his son- or daughter-in-law dad(a) 'father', and the mother-in-law - nan(a) 'mummy', dzej 'a polite address to a woman'. When married, a woman was traditionally given a new name by her husband's family, which was henceforth used by all members of the new family, including all their friends and relatives.
3.9. The Social Status of First Names

In the past, the social relations within the feudal Abkhaz society were reflected in the choice of names: some were usually given to the nobility and others—to the commoners. The names traditionally given to the “nobles” were: Adamơr, Alơbej, Alơw, Alơnaxsit, Ardašičl, Arzaq’an, Bazơq’an, Babőši, Batal(bej), Dadaši, Darơq’wa, Edlơ-hanơm (fem.), Esma-hanơm (fem.), Ešsow, Msaust, Naharbej, Sad, Sаfrơ-hanơm (fem.), Sasrơq’an, etc. The “peasant” names were such as Abga, Ažơr, Bazala, K’wadac, Kǝş’, Pat’ơwx’, Xak’wec’, Șxanŏq’an, etc. (cf. Inal-ipa 2002: 27). Nowadays, these distinctions are mostly forgotten.

4. Surnames

Among oldest surnames attested in mediaeval Georgian chronicles are Čađiba and Maršičan, belonging to highest Abkhazian aristocracy. Etymologically, surnames can be based on personal (patronymical) names, ethnic terms, native or borrowed words. The majority of native surnames have as their most typical formant the suffix -ba, derived from the patronymic formant jo-pa 'his son', e.g. Agr-ba, Adlej-ba, Cwεj-ba, Č’an-ba, Haš-ba, Zǝx'-ba, etc. In some cases, the patronymic suffix is preserved in its original form in the "official" form of the name: Inal-jıpа, P’at’e-jıpа, Šat-jıpа, 3apš’-jıpа.

The feminine forms of surnames have as their formant -pha 'daughter', e.g. Agr-phа, Adlej-phа, Č’an-phа, Haš-phа. In the Abkhazian diaspora in Turkey, this formant is more often rendered in a phonetically simplified form -ha, e.g. Ager-ha, Ak’ert-ha, Sağ-ha.

Other typical surnames formants are -wa (Ag*xa-wa, Andarb-wa, Anε-wa, Șlap’-wa), -aa (Abyaż’-aa, Ak’ert-aa, Ag*ım-aa, Aroj*tt-aa, Arst-aa, At’m-aa), -ja (Barganţ’-ja, G*aramđ-ja, Kh’ak’alơ-ja, Plơ-ja), etc. As to the last type of names, both the formant -ja and often the surname itself, are of Megrelian origin, except for the cases when this element was attached in the official Russian-language registers to the genuine Abkhaz names by Megrelian and Imeretian priests who served in Abkhazia at the end of the 19th – the beginning of the 20th centuries in order to make them appear “Georgian”; whence such hybrid surnames as Lak’erbaja (cf. the genuine Abkhaz form Lak’rba), Zvanbaja (for Žwanba), Šxvacabaja (for Ašwxwa-đaa), etc. There are also surnames, which are void of suffixed formants,
and their etymology is uncertain, such as Barcæ, Baalow, Baras, Ðacc-bal(ørw)a, Dhar, Hašær, Kapši, Kišewät, Maan, Marššan, Pkšen, Šom-šom, Smor, Šiov-šiev, Trapsi, etc.

The plural forms of surnames are usually marked by the human collective plural suffix -aa, added to the suffix-less form, e.g. Agr-aa, Adlej-aa, Čían-aa. Alternatively, plural forms can be formed by adding plural suffixes -cwa or -kwa to the suffixed form of the surname, e.g. Agær-ba-cwa, A-k'alc-ba-kwa.

4.1. The Social Status of Surnames

Like first names, surnames were also marked for their social status. The name of the old princely ruling house of Abkhazia was Čiaðba (which had its parallel Georgian variant Šervasige), who occupied the highest place in the social hierarchy and bore the title of ah ‘prince’. The Chachbas were followed by such high aristocratic family clans, called aam(ə)sta-dəw ‘big aristocrat’ (in Russian usage kniaz ‘prince’), as Aðba, Ajomxaas, Čaaβalærwa, Čixoťwa, Glaðba, Inal-jøpa, Marššan, Zapš-jøpa. To the nobility, called aam(ə)sta (Russ dorpkihni ‘noble’), belonged such family clans as Akærtaa, Aščwac’aa, C’æšba, Jašba, Læk(ə)ra, Maan, Zwanba, etc. The peasants, called a-ænjwa, were represented by such surnames as Agrba, Adlejba, Amæðba, Axba, Bganba, Cæg’ba, Çíanba, Kæba, Lakæba, Pap’ba, etc. The lowest place in the social ladder used to be occupied by people consisting of lower categories of peasants, slaves, foreign captives, people bought or kidnapped, bastards or gutter-children, who did not possess a surname (a-æwk-là-da, lit. ‘without a surname’, or æwk-là z-ma-m, lit. ‘who do not have surname’). They were called only by their first names or nicknames. Some of such people or their descendants could receive in the course of time a new surname on the model ‘X-his-son’, but the lower origin of such clan was long remembered (cf. Inal-ipa 2002: 189-190). People who committed “shameful” crimes, like incest or the like, were subjected to the deprivation of their first name (a-æwk-là-xø-x-ra ‘the lifting of the name’) or of their surname (a-æwk-là-xø-x-ra ‘the lifting of the surname’), and were usually expelled from the community.

5. PATRONYMS (Abx abjøpara)

Certain surnames can have patronyms (called ab-jo-pa-ra ‘father-his-son-ABSTR’) modeled on the type “first name of a common ancestor + _jo-p(ə)-
cwa ‘his-son-PL’", or “first name of an ancestor + collective human plural suffix -aa". The patronyms are not registered in official papers and are transferred through generations orally. Especially big family clans have patronymic branching. E.g., the clan Adlejba has such patronymic subdivisions as Tət'-jə-p(a)-cwa, Žabəj'-jə-p(a)-cwa, Paš'-jə-p(a)-cwa, Xət'-jə-p(a)-cwa, Çərk'-jə-p(a)-cwa, Cəx'-jə-p(a)-cwa, Dəh'-qəjə-p(a)-cwa, Čərkəz'-jə-p(a)-cwa, Çərvel-jə-p(a)-cwa, all having as their common ancestor a certain Adlejba Xrəps, son of Ak'wən (cf. Šəŋk'ba 1990: 447). In unofficial discourse surnames and patronymics can be used synonymically, like Xərck'ıjal jə-pha “Xvartskiya//Son/daughter-of-Džygudar", or in PL Xərck'ıjal-aa / jəg'əjə-pa-cwa//jəg'əjə-pa-cwa//jəg'əjə-pa-cwa//jəg'əjə-pa-cwa 'the Xvartskiyas//Sons-of-Džygudar//The Džygudars'.
